Whereas, the Halifax Road extending from Petersburg south through Carson, Stony Creek, Jarratt, Emporia to the North Carolina line, in the judgment of this Board, is one of the most important highways in the State of Virginia, and,

Whereas, the State Highway Commission has already had incorporated a part of said Halifax Road in the State Highway System, known as Route No. 24, leaving Route No. 35, at a point about nine miles south of Petersburg, extending through Carson, Stony Creek, Jarratt, Emporia, to the North Carolina line, and

Whereas, said location already leaves out an important part of the old Halifax Road lying in Dinwiddie County, being about eleven miles from old Carson to the City of Petersburg, to which the people of Dinwiddie have become more or less reconciled,and

Whereas, this Board is now advised that the State Highway Commission contemplates a further change in said Route No. 24, which will eliminate the balance of the road lying in Dinwiddie County, and will leave the Town of Carson several miles off of said road, and

Whereas, this Board is unanimously of the opinion that such a change is unjustifiable and it would be disasterour to the Town of Carson and the community through which the road now runs.

Now, therefore be it resolved, that this board unanimously petitions that State Highway Commission to retain Route No. 24, through Dinwiddie County, and the Town of Carson.

W. W. Matthews et als., filed with the Board a petition requesting the employment of a good man as special officer at the village of Kenilworth, which is ordered to be filed.

Ordered that W. L. Gibbs, Special Officer at Kenilworth be allowed the sum of fifty dollars ($50.00) per month payable out of the County levy for his services as such.

P. B. Halligan, Treas, presented his receipt for $77.32, which is in words and figures as follows,.

June 14th, 1927.

"Received of Mr. A. M. Orgain, Clerk, check of Mr. C. Lee Moore to the amount of $77.32, which has been apportioned to the general county fund."

Ordered that the Board be adjourned until the next regular meeting.

In Re:
Temporary Loan.

It appearing to the Board that the County funds necessary to defray the necessary county expense are inadequate to meet the current expenses, and

It further appearing to the Board that in order to take care of the necessary expenses the Board will have to obtain a temporary loan.

On motion of G. M. Sutherland duly seconded and unanimously adopted by the Board, it is ordered that John R. Beck, Chairman of this Board make a note for the sum of one thousand ($1,000.00) dollars payable thirty days after date at the Planters Bank of Dinwiddie, to the order of the Planters Bank of Dinwiddie, said note to be discounted at the rate of 6% as provided by law.

Whereas, the funds derived from local sources when added to the appropriation now made by the State Board of Education are not sufficient to provide for the operation of a reasonably adequate public school system in Dinwiddie County, and

Whereas, the Board of Supervisors of this county has done everything possible to maintain a reasonable educational program, as attested by the fact that for the past several years a maximum levy, as provided by law for school

ope ation, has been laid on all taxable values, and in addition thereto, special appropriations made for schools from the county fund, and

Whereas, it is impossible to maintain the present facilities with current tax levies, due to depressed values and the consequent shrinkage in local funds, unless additional support is provided by the State.

Therefore, be it resolved, that the Board of Supervisors of Dinwiddie County recommends to His Excellency, the Governor of Virginia, and the Virginia State Legislature, to provide increased state appropriations for the schools of the Commonwealth for the next biennium; and

Be it further resolved; that a copy of these resolutions be sent to His Excellency, John Garland Pollard, Governor of Virginia, Hon. Robert Gilliam, State Senator, Hon. I. N. Coleman, Representative and Dr. Sidney B. Hall, State Supt. of Public Instruction.

Ordered that the above meeting be continued until Oct. 28th, 1931.

Therefore it is resolved by the Board that it be copied in the minutes to-day meeting, this resolution as follows:

Whereas, it has been suggested to this Board that the City of Petersburg might be interested in making an offer of compromise of the annexation proceedings brought by said City against the county of Dinwiddie

It is therefore Resolbed: that A. G. Butterworth and I. N. Coleman be, and they hereby are, appointed a committee to confer with the proper authorities of the said city of Petersburg to ascertain what proposal, if any, the said City desires to make in regard to this matter, and report back to this Board.

In Re:

Report of A. G. Butterworth, one of the Committee on the Annexation Proceeding.

Mr. A. G. Butterworth, reported the Board under authority passed by the resolution of this Board as of Oct. 13, 1931, That the City Counsel of Petersburg advised him at their meeting last night that they would advise the Board whether or not they could agree on a compromise in the annexation proceedings in the next few days.

Ordered that this meeting be continued until Oct. 31, 1931.

In Re:

Kenilworth Sanitary District.

Whereas, it is the purpose of this board to install water and sewerage in Kenilworth Sanitary District, Dinwiddie County, in accordance with plans already made, at the request of this board, subject to such changes therein to this board may seem beneficial or advisable, and

Whereas, this board has been authorized by a vote of the people and proper order of the Circuit Court of Dinwiddie County, to issue bonds in the sum of twenty eight thousand ($28,000.00) dollars for said purposes, and

Whereas, the said sum of twenty eight thousand ($28,000.00) dollars will be insufficient to complete the system contemplated by this board, in accordance with said plans.

Now therefore be it resolved: That a short term loan of sufficient amount to complete said system be made and effected by this board for the purpose of carrying out and completing said public improvements in said Kenilworth Sanitary District.

It is further resolved that action hereon be suspended until the termination of the pending annexation proceedings brought by the City of Petersburg.

In Re:

W. Potter Sterne, Esq., Attorney for the Commonwealth, and Morton G. Goode, Esq., counsel for this Board in the pending Annexation Proceedings brought by the City of Petersburg, in the Circuit Court of Dinwiddie County, appeared before the Board and exhibited a copy of the proposed answer for the Board, which copy is filed with the records of the Board, and which being read in full, upon motion duly seconded, it was by a unanimous vote of the

Board resolved that the said counsel be authorized to execute and file the said answer for this Board in the said Annexation Proceedings in due course.

And although the condition of his health for the past several years had been precarious, he continued to perform his duties as Chairman of the Board of Supervisors of Dinwiddie County, in addition to his other business activities.

John Rowland Beck started to serve as a member of the Board of Supervisors of Dinwiddie County in August, 1914, and he served as Chairman of this Board from 1916 until he passed on to the great beyond.

As a business man and Chairman of the Board of Supervisors of his county he commanded the respect of all of the citizehs of Dinwiddie County, but it was his happy, genial and companionable disposition and spirt that won him the affection and esteem of not only his close associates but also of all persons who came in contact with him, and these qualities will endure long in their memories of him.

And while he had excellent business judgment and was considered as a leader in business in his county, yet the pleqsant and cordial smile with which he could always greet his fellowman, even at a time when physical infirmities bore down upon him, endeared him more and more to his friends and drew to him people as friends who frequently differed from him in their opinions. he was loved by the citizehs of Dinwiddie County and Dinwiddie County has lost an invaluable citizen and a lovable character.

The fact that John Rowland Beck was continuously a Public Officer for so many years without opposition bespeaks the feeling of his constituents towards him.

THEREFORE, BE IT RESOLVED, that copies of these pesolutions be sent to his familty and be published in the Petersburg Progress-Index; and that copies be also apread on the minutes of the Board of Supervisors of Dinwiddie County and be presented to the Circuit Court of Dinwiddie County.

In Re: Pay of Board.

Whereas, it has been brought to the attention of the Board of Supervisors, by the Commonwealth's Attorney of Dinwiddie County, that they have probably committed some errors in receiving expenses and/or compensation in connection with and acting as the Re-Employment Committee with the C. W. A. work in said county, the said expenses and/or compensation being paid by the said Board of Supervisors of Dinwiddie County to the said G. M. Sutherland, John M. Barner, W. R. Young, and T. M. Netherland, while they were members of the said Board, and

Whereas, although, as the records will show, the amounts received by the said members of the said Board, in this connection, are very small and have not defrayed the actual expenses incurred personally by the said members in this regard, and

Whereas, the said Board of Supervisors of Dinwiddie County and the said members thereof feel that morally they are entitled to a great deal more than they have received, nevertheless, the said Board and the said members thereof feel that if there be any possible legal im'ropriety in their having received these small sums, they do not wish to be placed in any such light and the said members of the said Board do not wish to retain any such sums so received, and

Whereas, it is the wish and desire of the said members of the said Board that any amounts so received be charged as advances on their salaries and mileages as members of the said Board of Supervisors and that they receive no further salaries and mileages as members of the said Board until such sums, so received, have been refunded to the said county of Dinwiddie, and

Whereas, Milton I. Hargrave, one of the Deputy Clerks of the Circuit Court of Dinwiddie County and who acts as Clerk of and for the said Board of Supervisors of Dinwiddie County has received from the said Board of Supervisors of Dinwiddie County some very small amounts under the same conditions as the members of the said Board, as above set forth, the said

Board of Supervisors having ordered such amounts paid to him, and

Whereas, this situation being also called to his attention and to the attention of the said Board by the said Commonwealth's Attorney of Dinwiddie County, and

Whereas, the said Milton I. Hargrave feels the same way about this matter as the said members of the said Board and also feels that if the said members of the said Board are to refund to Dinwiddie the amounts so received by them, then he should refund the amounts so received by him by having the same charged as advances.

Now therefore be it resolved, by the Board of Supervisors of Dinwiddie County, Virginia, that the said G. M. Sutherland, John M. Barner, W. R. Young, T. M. Netherland, and Milton I. Hargrave, refund to the said County of Dinwiddie such sums as they have received as expenses and/or compensation in connection with Re-Employment work with the C. W. A. in Dinwiddie County, such sums to be charged as advances on salaries and mileages and the above named persons not to be paid any further salaries and mileages until the aforesaid sums so received have been repaid to the County of Dinwiddie.

And the aforesaid resolution on motion duly made and seconded having been duly passed by the said Board of Supervisors, all members being present and voting "aye" and no members voting "no" it is ordered and directed by the said Board that the said resolution be executed and performed.

SPECIFICATIONS FOR SEPTIC TANK CONSTRUCTION

BE IT RESOLVED by the Board of Supervisors of Dinwiddie County that the following interpretations, rules and regulations for the construction of septic tanks as specified by the local health department shall prevail in Dinwiddie County on and after April 1, 1942.

BENERAL: The septic tank system includes the sewer line running from the building to the septic tank; the septic tank; the distribution box; and the purification field, which includes distribution lines, purification lines, and all appurtenances thereto.

SEWER LINE: The sewer line shall be constructed of cast iron hub and spigot pipe of not less than 4" nominal diameter, and each length shall be sound and free from defects. All joints shall be firmly packed with oakum or hemp and leaded with pure lead, well caulked. Where the sewer line does not pass within 75' of a water supply, vitrified tile pipe may be used. The line shall run to the tank as directly as possible from building. Where bends must be made, 1/8 or 1/16 shall be used. Where it is necessary to use 1/4 bends, permission must be obtained, in writing, from the health department. The sewer line shall remain uncovered until inspected and tested by an authorized member of the health department.

SEPTIC TANK: The septic tank system shall be located at least 75' from any water supply, and shall be constructed of concrete, cinder blocks, or bricks. If cinder blocks or bricks are used, the inside shall be plastered so as to make it watertight. In no case shall a tank have a working capacity of less than 720 gallons. Where more than 10 persons are to occupy the house, or more than six bedrooms are provided, the size of the tank will be determined after inspection by a member of the health department. In any case, the depth of liquid shall not be less than 4' and the inside length shall be 7' for the 720 gallon tank. In the tank, 1 ft. of air space shall be provided above the

water line. The inlet and outlet of the tank shall be fitted with a tee connection. The outlet tee shall extend a depth of 2 ft. under the surface of the liquid.

DISTRIBUTION BOX: A distribution box shall be provided for the even distribution of the septic tank effluent to the distribution and purification lines. All outlets from the box shall be on the same level.

PURIFICATION LINES: The purification lines shall consist of 4" drain or farm tile, laid on a 4" bed of cinders or gravel, and with an even grade of 1/2" in 12 ft. The ditches containing the lines shall be at least 24" wide. In addition to the 4" bed of cinders or gravel under the tile, this material must also be laid around and shall extend over the tile to a depth of not less than 1". The lines shall be laid on grade boards as straight as possible. At no place shall they be less than 5" apart. No wye or tee branches will be allowed. No ashes, sand, or earth may be mixed with the bedding material. The size known as pea gravel is desirable. Each joint shall be laid with 1/2" opening and the top covered with roofing paper strips at least 6" wide and 12" long. The number and length of the purification lines shall be determined by the health department after inspection of the site.

INSPECTION: The health department shall be called upon to make an inspection of the site before construction is begun to determine the size and location of the system. The sewer line, distribution lines, and purification lines shall be inspected before being covered. The septic tank and the distribution box shall be inspected before being sealed. When the system is ready for inspection, the health department shall be notified by the owner or builder.

CHANGES IN SPECIFICATIONS: Special conditions sometimes necessitate changes in the above specifications. These changes will be made only by the health department, and should be received, in writing, before assumed by the owner or builder.

AMENDMENTS: The foregoing rules and regulations may be amended from time to time by this Board upon the recommendation of the local health department.

In Re: AN ORDINANCE TO REGULATE THE SANITATION OF ALL PLACES USED IN THE MANUFACTURE, PACKING, STORING, SALE OR DISTRIBUTION OF FOOD OR FOOD PRODUCTS AND BEVERAGES AND PROVIDING FOR THE INSPECTION, THE ISSUING AND REVOCATION OF PERMITS AND THE FIXING OF PENALTIES

BE IT ORDAINED by the Board of Supervisors of Dinwiddie County as follows:

That in the County of Dinwiddie,

Section I. It shall be unlawful for any person, firm, or corporation to maintain or operate in Dinwiddie County without a permit from the Health Department or its duly authorized agent, any establishment which manufactures, packs, stores, sells or distributes food or food products or beverages.

VIRGINIA STATE DEPARTMENT OF HEALTH
FOOD ESTABLISHMENT ORDINANCE AND CODE

Section 1. RESTAURANT -- The term "restaurant" shall mean restaurant, coffee shop, cafeteria, short order cafe, luncheonette, hotel dining room, tavern, sandwich stand, soda fountain, and may include boarding houses where there are five or more boarders per day, at the discretion of the Board.

Section II. FLOORS. The floors of kitchens shall be made of tile, concrete, or other impervious material approved by the Health Officer, or of wood; and shall be kept clean and in good repair. Entire floor of kitchens must be free of unnecessary articles.

Public health reason: A well drained floor of impervious material promotes cleanliness.

Satisfactory compliance: This item shall be deemed to have been satisfied when the floor (1) Is of sound construction. (2) When cleaning methods in use make it possible to consistently present a neat and clean appearance. (3) When no unnecessary articles are stored in the kitchen.

Section III. WALLS AND CEILINGS. Walls and ceilings must be constructed of material that can be cleaned easily; painted with a light colored paint, or finished in a manner approved by the Health Officer.

Public health reason: Clean, light colored walls encourage cleanliness and reduce likelihood of dust and dirt getting into the food.

Satisfactory compliance: This item shall be deemed to have been satisfied if the walls and ceilings: (1) Are of sound, tight construction, of some light color. (2) Always present a clean smooth surface.

Section IV LIGHTING AND VENTILATION. Window space must be not less than ten percent of the floor area, and windows must be so arranged as to give the maximum amount of natural light. Adequate artificial light must be provided for use during periods when there is not sufficient natural light. Metal hoods over ranges, equipped with ventilators, and exhaust fans must be provided where the Health Officer deems it necessary.

Public health reason: Ample light promotes cleanliness, and proper ventilation reduces likelihood of odors.

Satisfactory compliance: This item shall be deemed to have been satisfied if the window space is not less than 10% of the floor area and light is reasonably, evenly distributed, and if the kitchen is reasonably ventilated in the judgment of the Health Officer. Artificial lighting may be resorted to.

Section V. DRAINAGE. Drain and waste pipes from floors, wash sinks, soda fountains, ice boxes, etc,, must be of sufficient size, well trapped, and in a good state of repair.

Public health reason: The potential menace of escaping sewer gas can present a health hazard; and improperly drained fixtures may create nuisances.

Satisfactory compliance: This item shall be deemed to have been satisfied if the drain and waste pipes from all floors and fixtures (1) Are in accordance with good plumbing practice. (2) Disposition of waste material does not create a nuisance or health menace.

Section VI. SCREENING. Screening shall be considered satisfactory if all openings are effectively screened. Outer doors must open outward and be self-closing, unless other effective means are provided to prevent the entrance of flies. Other methods approved by the Health Officer may be used in addition to prevent flies in food establishments.

Public health reason: Effective screening tends to prevent the presence of flies, which are a public health menace. Flies may infect the food with disease germs and thereby spread disease to the consumers.

Satisfactory compliance. This item shall be deemed to have been satisfied if all openings are effectively screened whenever flies are evident and out doors open outward and are self-closing, unless other effective means are provided to prevent the entrance of flies.

Broken, torn, or poorly fitted screens shall not be accepted as satisfactory compliance. Fly exclusion can be made more effective when screen doors open outward and are made self-closing.

Section VII. TOILETS. Adequate, approved toilet facilities must be provided for employees. Toilets must be constructed and maintained in accordance with the current rules and regulations of the State Health Department.

Toilets must be entirely separate and apart from any room used for the manufacture, storage, or handling of food products. Flush toilets used in any food establishment must be provided with tight, self-closing doors, and all new construction must be vestibuled, and toilet room must be ventilated by means of window or flue leading to the outside. All flush toilets must be connected to an approved sewer system or provided with properly constructed septic tank.

Walls, floors, seats, and commodes must be clean, and a supply of toilet paper must be provided.

Public health reason: Filth borne diseases, such as typhoid fever, dysentery and colitis, are spread from the bowel discharges of human beings. In the case of typhoid fever, well persons (carriers) may discharge the organisms in their body wastes. If a toilet is not fly-tight and so constructed as to prevent overflow, infection may be carried from the excreta to the food by flies, or through the pollution of water supplies.

Satisfactory compliance: This item shall be deemed to have been satisfiled if (1) whatever method of sewage disposal is practiced, construction is in accordance with good practice, and built from plans and specifications of the State Health Department. (2) All equipment is kept in a sanitary condition. (3) All equipment is kept in good repair.

Section VIII. HAND-WASHING FACILITIES. All food handlers must observe a high standard of personal cleanliness, and they must be constantly supervised in this respect by the employer. The hands of all employees must be washed thoroughly in hot, soapy water after visiting the toilet. The waiters, cooks, etc., should be trained to keep their hands away from the mouth and nose to wash their hands immediately in hot, soapy water should they become contaminated with oral or nasal secretions. Employees must keep fingernails short and clean.

Adequate hand-washing facilities include running hot and cold water or a suitable vessel and an adequate supply of clean water, soap, and a clean individual towel for each employee.

Public health reason: The hands of persons who prepare and serve food are constantly in contact with food; and, unless food handlers are scrupulously careful, dangerous contamination often will occur. Washing facilities are required in order to increase the assurance that the hands of food handlers will be washed frequently.

Satisfactory compliance: This item shall be deemed to have been satisfied when: (1) Handwashing facilities, including clean towels (preferably paper towels) are provided in or easily accessible to the kitchen. (2) All employees are always particular to wash their hands after each visit to the toilet, and at other necessary times.

Section IX. KITCHEN UTENSILS. All kitchen utensils must be an approved type, constructed of heavy gauge material, with a not readily corrodible surface and of a shape that will make cleaning easy. All containers, utensils, and other equipment, must be in good repair, free of breaks, open seams, and corroded places. All utensils not in use must be stored above the floor, inverted when practicable, and protected from flies, dust and insects.

Public health reason: Cooking utensils made from porous or absorbable material, and utensils in bad repair cannot be kept clean. The accumulation of food particles in such utensils might prove harmful to consumers of food prepared or served in them.

Insects, vermin, or dust are things to keep away from food of anything that comes in contact with food. They are all potentially dangerous to public health.

Satisfactory compliance: This item shall be deemed to have been satisfied if: (1) All containers, utensils, and other equipment are constructed of heavy guage material with a not readily corroded surface, of a shape that will make cleaning easy. (2) All containers, utensils, and other equipment are in good repair, free of breaks, and corroded places. (3) All containers, utensils, and other equipment are stored above the floor (inverted when practicable) in such a manner that insects, dust and vermin cannot contaminated them.

Section X. DISHES, CUPS, GLASSES, ETC. Dishes, cups, glasses, &c., must be of an approved type, free of cracks and chipped places, clean, properly sterilized after each usage, and stored and thereafter handled so as not to become contaminated.

Public health reason: In regard to design and repair the same cleanliness and storage would apply as in section 10. In addition, eating utensils that come in contact with the mouth of the consumer, directly or indirectly, must be sterilized in an approved manner to eliminate the possibility of the spread of disease from one user to another.

Satisfactory compliance: This item shall be deemed to have been satisfiled if (1) In accordance with Section 10 regarding design and storage, and in accordance with Section 15 regardingsterilization.

Section XI. SILVERWARE. Silverware must be in a good state of repair, clean, properly sterilized after each usage, and stored so as not to become contaminated.
No article, polish, or other substance containing any cyanide preparation or other poisonous material shall be used for the cleansing or polishing of eating or cooking utensils.

Public health reason: Stated in Sections 10, 11 and 15.

Satisfactory compliance: Stated in Sections 10, 11 and 15.

Section XII. MECHANICAL EQUIPMENT. Mechanical equipment must be maintained in a good state of repair, clean at all times, and sterilized as often as the Health Officer deems necessary.

Public health reason: Stated in Sections 10, 11 and 15.

Satisfactory compliance: Stated in Sections 10, 11 and 15.

Section XIII. DISHWASHING EQUIPMENT. Adequate facilities must be maintained for the washing, rinsing, and sterilization of all utensils used in the preparation, handling, and serving of food and beverages. The following is considered the minimum equipment for washing, rinsing, and sterilizing such utensils: Adequate facilities for heating water for cleaning; stationery wash and rinse vats of not less than three compartments, or, if chemicals are used to sterilize utensils, a four compartment vat must be provided. An approved washing powder must be used.
In certain types of establishments where only beverages and ice cream are served, cold water washing of glassware and silver may be approved, if thorough and effective.

Public health reason: To eliminate the possibility of the spread of disease, eating utensils must be properly sterilized between uses. In order to accomplish this, certain equipment and methods are essential.

Satisfactory compliance: Facilities for heating water must be provided, Small establishments, when only beverages are dispensed, may find it advantageous to use paper containers to obviate the trouble involved in providing a constant hot water supply.

Wash and rinse vats are necessary. If hot water sterilization is used a minimum of three compartments are essential. If chlorine treatment is practiced, four compartments are necessary, one for washing, one for rinsing, and one for chemical treatment, one for reheating.
Steam cabinets properly operated are acceptable.
The use of an approved washing powder or soap.

Section XIV. METHODS OF STERILIZATION RECOMMENDED. One of the following methods must be used: Steam, hot water, and chlorine chemicals. If steam is used as method of sterilization, utensils must be exposed for at least fifteen minutes to at least 170°F., or for at least five minutes at 200°F. in a steam cabinet; or exposed to a jet of steam for at least one minute; or submerged in hot water at 170°F., or more, for at least two minutes; or exposed to

a chlorine solution containing not less than fifty parts per million of chlorine; for at least two minutes (a solution containing one hundred parts per million, or more, is recommended).

The practice of drying eating utensils with a towel shall not be permitted.

Provided that nothing contained in this section (XIV) shall be construed as disbarring any other process which has been demonstrated as of at least equal efficiency and is approved by the Health Officer.

Public health reason: Mere cleansing of containers, equipment and utensils does not insure that all disease organisms will have been removed or destroyed. For this reason all dishes, glasses, silverware must be treated, after thorough cleansing, with a bactericidal agent between each usage.

Satisfactory compliance: This item shall be deemed to have been satisfied, if silverware, dishes, glasses, etc., are (1) Exposed for at least 15 minutes to at least 170°F, or for at least five minutes to at least 200°F in a steam cabinet; or exposed to a jet of steam for at least one minute, or (2) Submerged in hot water at 170°F, or greater for at least two minutes, or (3) Submersion in a chlorine solution (approved) containing not less than 50 p.p.m. for at least two minutes. (4) Dishes or glassware must not be towel dried, else what is accomplished in bactericidal treatment will be largely discounted.

Provided that nothing contained in this section (XIV) shall be construed as disbarring any other process which has been demonstrated as of at least equal efficiency and is approved by the Health Officer.

Section XV. TABLES, SHELVES, ETC. All tables must be properly constructed of materials that can be thoroughly and easily cleaned. All table tops must be of non-absorbent material when deemed necessary by the Health Officer. Table tops must be free of unnecessary articles. Table covers, napkins, etc., must be clean and all shelves shall be clean, free of unnecessary articles and neatly arranged. All napkins shall be discarded or laundered after each usage.

Public health reason: Table tops, shelves, etc., must be constructed of proper material in order that they may be easily and properly cleaned, else food might become contaminated; cracks eliminated on table tops by solid or metal tops so that dirt will not accumulate therein. Cleanliness is essential in the preparation and serving of food, if the public health is to be protected.

Satisfactory compliance: This item shall be deemed to have been satisfied if (1) Table tops where food is handled must be solid, or covered, or so tight that no cracks are perceptible. Tables, shelves, etc., must always present a clean appearance. No unnecessary articles must be stored thereon. All linen used shall be clean. Napkins shall serve but one customer, and must be destroyed or laundered thereafter.

Section XVI. GARBAGE CANS. Garbage cans shall be of non-absorbent material, leak-proof, adequate size, with tight fitting top and must be kept reasonably clean.

Public health reason: Garbage attracts flies and therefore must be handled in a manner that will not create a nuisance or health hazard.

Satisfactory compliance: This item shall be deemed to have been satisfied if (1) a leak-proof, fly-tight fitting top of sufficient capacity is provided. (2) Disposition of garbage is such that a nuisance is not created.

Section XVII. WATER SUPPLY. Any water supply at a food establishment shall be properly located, constructed, operated, and shall be easily accessible, adequate, and of a safe sanitary quality.

Public health reason: The water supply should be accessible and adequate so that cleaning operations can be thorough and its quality should meet public water supply standards to avoid infection of eating utensils.

Satisfactory compliance: This item shall be deemed to have been satisfied, when the water supply is easily accessible, adequate, and can be approved by the State Health Department.

Section XVIII REFRIGERATION. Refrigerators, ice boxes, etc,, shall be of adequate size to store all perishable food, constructed of materials that will permit thorough cleaning, shall be properly drained and ventilated, shall be equipped with thermometer and kept at a temperature below 50°F., at all times, except during periods of defrosting. Floors, walls, ceilings, racks, hooks, pipes, etc., shall be kept clean.

Public health reason: Refrigeration is necessary to preserve food supplies, and therefore must be adequate, efficient and clean.

Satisfactory compliance: This item shall be deemed to have been satisfied when (1) Refrigerators, ice boxes, etc., are adequate to store all perishable food, are kept scrupulously clean and free from odors, properly drained, equipped with thermometer, kept at 50°F., or lower.

Section XIX. MILK AND CREAM. Only graded milk shall be used or served in a food establishment. Official placards, stating the grade of milk served, whether pasteurized or raw, must be displayed in a place designated by the Health Officer. All milk must be served in the original container in which it was bottled at the plant.

Public health reason: Milk stands second only to water as a disease vehicle; actually has caused many epidemics in the past, and still is causing many epidemics. The purpose of local and State regulations promulgated for

the establishment of grades of milk is to reduce to a minimum the possibilities of contaminating the supply with pathogenic organisms. The milk placard and the cap on the bottle should convey to the consumer that the milk served has been safeguarded by precautions taken in producing and processing.

Satisfactory compliance: This item shall be deemed to have been satisfied when (1) only graded milk and cream are served. (2) Milk is served in the original container in which it was placed at the plant (cream excepted), (3) A milk placard is posted showing grade of milk and whether same is raw or pasteurized.

Section XX FOOD COVERED. All prepared foods and foods consumed in the raw state must be protected from flies, dust, dirt, etc., by properly covering, wrapping with celophane, or displaying in fly and dust-proof cases.

Public health reason: Every precaution to eliminate the possibility of foods becoming contaminated by dust or dirt must be observed.

Satisfactory compliance: This item shall be deemed to have been satisfied when all prepared foods and foods consumed in the raw state are protected from flies, dust, dirt, etc., by properly covering, wrapping with celophane, or displaying in fly and dust proof cases.

Section XXl. EMPLOYEES' CLOTHING. Employees must wear clean, washable outer garments at all times while engaged in the preparation, handling, and serving of food.

Public health reason: The public health reason for this item is obvious.

Satisfactory compliance: This item shall be deemed to have been satisfied when employees wear clean, washable outer garments at all times while engaged in the preparation, handling, and serving of food.

Section XXII. EXAMINATION OF FOOD-HANDLERS. When suspicion arises as to the possibility of infection every person connected with any food establishment in the County of Dinwiddie whose work brings him in contact with the handling, storage, transportation of food or food products, shall furnish such information, permit such physical examination, and submit such laboratory specimens as the health officer may require at any time for the purpose of determining freedom from infection.

Public health reason: The public health reason is obvious.

Satisfactory compliance: This is explained in the item itself.

XXIII VERMIN AND RODENT CONTROL METHODS. Owners and operators of food establishments must employ methods for controlling vermin and rodents.

Public health reason The presence of vermin or rodents is an index of uncleanliness, which should condemn the establishment until methods are found and used that will eliminate either or both.
